

Second Significant Accounting Software Product Release in a Week

AccountMate Software Announces AccountMate 8.3 for LAN Build Update

Petaluma, CA ([PRWEB](#)) April 10, 2015 -- For the second time in a week, AccountMate Software announces the release of enhanced product deliverables. The most recent is an update to one of their flagship products, AccountMate for LAN.

David Dierke was quoted saying that “AccountMate 8.3 for LAN is the latest in a long line of updates to our LAN product line. AccountMate LAN accounting software systems have been available to clients since 1995. The consistent rollout of new features is our assurance to our reseller channel and their clients that AccountMate is committed to providing long-term enhanced functionality.”

AccountMate’s standard way of evaluating product enhancements is to get requests directly from their resellers and clients through a formal enhancement process. This process coupled with AccountMate’s core-competency of providing modifiable software to mid-market clients have been the corner-stone of AccountMate’s successful run in business for the past 31 years.

Just a few of the noted enhancements for this AccountMate 8.3 for LAN product Build are the enhanced analysis added to Executive Summary, ability to apply down payments directly to advanced bills, and the ability to process AP checks separately from electronic payments.

This AccountMate LAN update rolled out on Wednesday, April 8th.

About AccountMate

Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support hundreds of users simultaneously. AccountMate software is available for local installation or as SaaS. It is distributed exclusively through a worldwide channel of authorized solution providers. AccountMate can be reached at (800) 877-8896 or at accountmate.com.
