Debut of AccountMate Enterprise 2015 Version Released Today Means Continuous Enhanced Software System for Clients

Roll out of new product line means enhanced functionality and capitalizing on the latest technology for AccountMate clients.

Petaluma, CA (PRWEB) April 02, 2015 -- David Dierke, President & CEO of AccountMate Software Corporation, announced today the release of an important new product platform. "This AccountMate Enterprise 2015 software solution is a clear indication that our company and our software systems continue to meet the needs of small to mid-sized clients who want to run on a robust accounting system or who need customizable software to run their business."

This AccountMate Enterprise 2015 version has been released running on newer technology (Microsoft .Net running on a SQL database) and introducing a Report Designer and the first modules, System Manager and General Ledger.

Per Tommy Tan, Chief Technology Officer, this was a purposeful decision to release this latest AccountMate Enterprise 2015 product line with a few modules, "It is our intent that our AccountMate reseller channel will want time to install software, view the source code and understand when and how to use this latest Software Developer Kit (SDK). Starting with a few modules and rolling out remaining ones at a future time should benefit them and their clients' adoption rate. We are excited at the prospect of clients taking advantage of AccountMate's newest product release functionality".

To aid the adoption rate, AccountMate Enterprise 2015 will release with a unique opportunity for those clients already running the current AccountMate 9.2 for SQL product. They can operate using the upgraded functionality of the AccountMate Enterprise General Ledger module with their installed AccountMate 9.2 SQL accounting modules. This will provide them new General Ledger enhanced features as well as practical experience running in this new technology environment. It should be a win-win situation for them and for AccountMate.

New software product releases like AccountMate Enterprise 2015 clearly demonstrate the growth of the AccountMate product lines as well as the benefits to clients for continuous enhanced accounting features. The long-term stability of the AccountMate products and evidence of consistent product development is assurance to clients that AccountMate is working with them to protect their valuable investment in their accounting system.

About AccountMate
Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support hundreds of users simultaneously. AccountMate software is available for local installation or as SaaS. It is distributed exclusively through a worldwide channel of authorized solution providers.
