

AccountMate Software Assures Clients and Prospects Can Be Ready for ObamaCare 2015 IRS Tax Filing

Updated AccountMate Payroll module enables the preparation for IRS forms filing with due-dates early in 2016

Petaluma, CA ([PRWEB](#)) September 30, 2015 -- AccountMate Software Corporation has proactively been preparing its accounting software system and educating its clients about the Internal Revenue (IRS) tax reporting requirements and deadlines to meet the Affordable Care Act (ACA) also known as ObamaCare. David Dierke, President and CEO of AccountMate, announced that, "In the spirit of preparedness, the way you do for other IRS tax deadlines, AccountMate wants to alert clients of the Internal Revenue Service tax reporting requirements that need to be handled by your company's accounting software this year. Specifically, I am talking about the regulations and timeframes about the Affordable Care Act (ACA) also known as ObamaCare. We will have the process and structures in place to help businesses prepare to meet the deadlines."

Although the end of the 2015 year filing seems to be some future activity, the preparation for meeting the ACA/ObamaCare IRS requirements means that work by businesses should start relatively soon. AccountMate is updating its Payroll module reporting structure as well as working with its vertical partner Aatrix to assure that their clients will have the means to complete and eFile the IRS reporting requirements in the timeframes spelled out by the IRS in early 2016. Information for this reporting comes from data supplied during the 2015 year.

AccountMate is so confident of its handling of this ACA reporting in its Payroll module that they are offering prospects using other accounting software systems to switch to the AccountMate system at discounted pricing and be able to install the Payroll module and System Manager in October, 2015. That would allow companies to wrap up end-of-year Payroll tax filing. Then, as their schedules dictate, they can have an AccountMate Solution Provider complete the conversion of data and installation of the remaining modules for a later date.

No businesses should ever feel that they are 'caught unawares' and without options. In the case of companies needing to comply with ObamaCare, AccountMate Software is poised and able to provide the structure to help clients meet the IRS report filing.

About AccountMate

Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support hundreds of users simultaneously. AccountMate software is available for local or cloud installation. It is distributed exclusively through a worldwide channel of authorized solution providers.
