## **Tamlin Software's Manufacturing Conductor™ Supports Allegro Fine Foods' Traceability Requirements of Section 306 of the Bioterrorism Act**

*Tamlin Helps Clients Meet Compliance Global Food Safety Initiatives (GFSI) Quality Requirements for New Government Safety and Security Regulations*

**Dallas, Texas, Feb. 10, 2011** – [Tamlin Software Developers, Inc.](#), a leading provider of manufacturing and accounting software, is helping manufacturers and distributors meet the traceability requirements of Section 306 of the Bioterrorism Act by installing its [Food Manufacturing Conductor™](#) software as an add-on to AccountMate financial software.

One of Tamlin's clients, [Allegro Fine Foods](#), a manufacturer and distributor of zesty marinades and sauces, was recently featured in an AccountMate [press release/case study](#) that detailed how Allegro's needs for a front-to-back office solution aligned with AccountMate's and Tamlin's software solutions. The combination of the two provider's systems enabled Allegro to meet the rigid compliance standards in the Public Health Security and Bioterrorism Preparedness and Response Act of 2002, which mandated that food companies, regardless of size, establish lot control.

In addition to needing a sophisticated financial management solution that incorporated lot tracking and control, Allegro wanted to comply with the Global Food Safety Initiatives (GFSI) mandating requirements for new government safety and security regulations. Tamlin's implementation of its Food Manufacturing conductor enabled Allegro to gain certification in two GFSI standards: Safe Quality Food (SQF) 2000 and International Food Standard (IFS) Version 5.

"AccountMate and Food Manufacturing Conductor helped us become FDA compliant and achieve SQF and ISF certification," says Marti Jones, Quality Assurance manager for Allegro. "Now we use the system to maintain our certifications – and we are very satisfied."

"Allegro and other food manufacturers and distributors need to focus on creating the very best product possible; they just don't have time to figure out the compliance maze of the Bioterrorism Act and GFSI initiatives," says Linda Bryan, Tamlin's CEO. "I'm very glad we were able to help Allegro with a solution that not only helped them become more efficient, but also met these unique quality and compliance standards."
