AccountMate Partners With Aatrix Software to Offer Integrated Federal and State Payroll Tax Electronic Filing

PETALUMA, CA--(Marketwire - Nov 16, 2011) - AccountMate Software Corporation has partnered with Aatrix Software, Inc. to produce an integrated Electronic Filing (eFiling) and electronic payroll reporting for their clients. Tommy Tan, AccountMate's Chief Technology Officer, said that, "The obvious trend has been that in addition to the Federal Tax eFiling requirements, more and more States are requiring this same type of tax handling. The integrated Aatrix eFiling services now give our clients more options in handling their electronic tax reporting without having to worry about security issues in getting this accomplished."

In addition to this integrated federal and state W-2 and 1099 eFiling service, Aatrix offers AccountMate payroll clients Federal and State payroll forms, more available services for increased payroll reports and a print and mailing out service for employees' W-2s directly or online. Other options include quarterly and annual new hire reports and the payment of employee eFiling requirements (940, 941, Wage Withholding, State & Federal Payments) as well as an unlimited filing selection.

AccountMate clients will be able to select and purchase these Electronic Filing (eFiling) and reports services through Aatrix Software, Inc. The Aatrix subscription model for clients to choose these optional services will be made from the AccountMate Payroll module which provides a flexible and tailored approach to meeting a growing company's needs.

Aatrix integration with AccountMate's financial management solutions assures that businesses will be able to generate timely reporting and transmission of online tax and employee filing with the added choice to allow employees the online viewing of these same transactions.

Steve Lunseth, President of Aatrix Electronic Payroll Reporting Division of Aatrix Software, Inc. was instrumental in working with AccountMate to make this real-time Federal and State eFiling option available in 2011. Steve commented that, "Throughout this entire integration process, AccountMate stayed focused on making this a seamless integration for their payroll clients. Aatrix shares AccountMate's commitment to making this optional payroll tax and employee reporting and eFiling an optimal resource for these clients through an onscreen selection process direct to Aatrix service centers."

About AccountMate Software Corporation
Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support over hundreds of users simultaneously. AccountMate Enterprise Resource Planning (ERP) software system is available for local installation, SaaS or hosted.
