

JobCost for AccountMate

Product Description

JobCost is designed to provide the tools to maximize productivity and profitability for the small to mid-sized contractor or for the business that needs project costing. It is seamlessly integrated with AccountMate's accounts payable, accounts receivable, payroll, inventory control, purchase order and sales order modules for their SQL platform. JobCost's functionality and interface are so similar to AccountMate's; it actually appears to be an AccountMate module.

In the Estimating function, a detailed estimate can be efficiently created with user defined cost codes. An estimate can also be created by copying a prior estimate, template or Excel worksheet. Within the change order function, an estimate for the new change order can be created which is combined with the original estimate to become the working estimate.

The contractor or project manager controls and manages the project with easy access to information such as the project status, key dates, key personnel, billing method, retention percentage, percentage complete, earned revenue, contract amount and billed to date amount. Since the actual costs are posted to the projects from the AccountMate modules in real time, the contractor or project manager can quickly review the up to date costs in detail or summarized by cost type and compare them to the estimate.

The Payroll function provides options to post the actual workers compensation insurance, employer payroll taxes and/or overhead costs to the projects. The payroll import feature imports payroll data from the time and attendance application or outside payroll service.

While JobCost utilizes AccountMate screens in the various modules, the purchase of AccountMate source code is not required. Source code is available for JobCost.

Company Profile

The company 4 Corner Software is the result of combining two companies with extensive experience in accounting software, information technologies and software programming. Creating one company with two complimentary companies, each with two or more decades of successful customer satisfaction and growth. This provides our customers with an extensive portfolio of unique solutions that can be customized to any small and medium sized businesses.

4 Corner Software is an AccountMate Elite Business Partner and has received their annual Outstanding Sales Achievement Award for the Western Region for 2005, 2008, 2009 and 2010. In 2008, they received the prestigious President's Award from AccountMate's President, David Dierke. In 2011, 4 Corners Software received the Exceptional Performance Award from INFOtrac for AccountMate. Accounting Today, a well-known national accounting publication, selected 4 Corners Software as one of Top 100 "Technology Pacesetters" in the nation for 2008 and 2009.

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support and warranties are the responsibility of the issuing company.
