

MKT Setup

Product Description

MKT Setup is an invaluable resource for anyone that modifies Visual AccountMate software. MKT Setup is easy to use and allows for fast and professional implementation of your client or in-house modifications, vertical products, and add-on products.

A programmer would enter the appropriate information in the MKT Setup tables using Visual FoxPro and then send the MKT Setup program and files to the client. The client would run MKT Setup and the changes designed by the programmer would be implemented on the clients system.

When used with an installation program like InstallShield, MKT Setup provides a seamless, intuitive, and complete solution to updating your clients for your products or modifications.

Company Profile

Tamlin Software Developers, Inc. has provided Enterprise Resource Planning and Shop Floor Control solutions to small to mid-range manufacturers and distributors since 1991.

An Elite AccountMate Business Partner and value added reseller, Tamlin has been selected by Accounting Technology as a Killer VAR in several years as well other awards including Top 100 and Bob Scott's VAR STARS.
