

Manufacturing Conductor

Product Description

Manufacturing Conductor™ is Tamlin's proprietary shop floor control software designed for small to mid-size manufacturers. Its simplified and easy to use interface keeps your people productive while getting you the information you need to realize your production goals. MC manufacturing software is also scalable allowing your company to grow without adding costly overhead.

Manufacturing Conductor manages shop floor and optimizes operations by providing real-time shop floor management data for optimum scheduling and shop management, it tracks location, usage and maintenance of tooling including expendables and provides data for Theory of Constraints optimization with WIP reports to help identify the constraints for scheduling.

This is a solution of choice especially for companies who need to track ingredients that are susceptible for recall by government or health organizations.

Company Profile

Tamlin Software Developers, Inc. has provided Enterprise Resource Planning and Shop Floor Control solutions to small to mid-range manufacturers and distributors since 1991.

Tamlin is the developer of Manufacturing Conductor which provides comprehensive shop floor control and real-time management of inventory and production activities including quality control and full traceability for lots and serial numbers. High quality, fast implementations allows Tamlin's customer to reap the value of their investment much sooner than industry standards.

An Elite AccountMate Business Partner and value added reseller, Tamlin has been selected by Accounting Technology as a Killer VAR in several years as well other awards including Top 100 and Bob Scott's VAR STARS.

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support and warranties are the responsibility of the issuing company.

KEY FEATURES
