"Driving American Success"

OurRecords

_____

Product Description

Automate your supply chain document management - Reduce your compliance cost and risk—and improve your product and process quality.

Leverage automated workflow and emails - Dramatically reduce the time spent chasing vendors and documents, while decreasing the likelihood of any details being missed. Instantly locate your compliance documentation for any supplier, item, employee or customer. AccountMate vendors, item, customers, and employees are integrated with OurRecords. Let your staff focus on higher payoff projects while OurRecords chases documentation for them with automatic notifications for current or pending non-compliance.

Stop having to nag your suppliers - OurRecords sends your suppliers automated alerts and reminders to stay in compliance and lets them upload their own documents to your system for their ingredients and packaging.

Be ready to handle audits anytime - OurRecords is always ready to provide current, complete and accurate compliance reports for GFSI, SQF, FSMA, customer and internal audits.

Have all your supplier details in one place - OurRecords centralizes and tracks supplier approvals, new vendor on-boarding and documents, staff prerequisites and training status, and more.

Company Profile

Tamlin Software Developers, Inc. has provided Enterprise Resource Planning and Shop Floor Control solutions to small to mid-range manufacturers and distributors since 1991.

Tamlin is the developer of Manufacturing Conductor which provides comprehensive shop floor control and real-time management of inventory and production activities including quality control and full traceability for lots and serial numbers. High quality, fast implementations allows Tamlin's customer to reap the value of their investment much sooner than industry standards.

An Elite AccountMate Business Partner and value added reseller, Tamlin has been selected by Accounting Technology as a Killer VAR in several years as well other awards including Top 100 and Bob Scott's VAR STARS.

KEY FEATURES

• Easily provide documentation to quality teams, auditors and customers

• Address your bottom line cost while gaining competitive advantages

• Efficiently and securely share compliance data across your value chain

• Leverage automated workflow and emails

• Handle records just as easily even if you're a larger company with many locations and participants

PRODUCT COMPATIBILITY

AccountMate 10 for SQL and Express Versions. LAN versions are not supported.
