

V2 Cloud
WorkSpaces

World's *Fastest* Cloud Desktop

Typical Challenges

- Worried about the increasing **Security, Backups & Reducing Compliance Risk**
- Want to enable **remote workers**
- Bring Your Own Device (**BYOD** Policy)
- Support **any** device (Mac, PC, Tablet)
- Want to **reduce** hardware and software **expenses**
- Don't want a full-time **IT** department
- Too **expensive** to maintain

The Big Question

- So, how do you handle all the latest security risks, while also allowing team members to work remotely, without increasing computer expenses or hiring an expensive IT team?

Introducing

- Cloud-Hosted Desktops!
 - Newer, high-speed **Internet connections** makes this possible
 - Little to **no difference** in **performance**
 - Often has **better performance** since the servers are high performance

Jump to [V2 Cloud](#) (if already familiar with cloud desktops)

Introducing

- Four Main Advantages of Cloud-Hosted Desktops
 1. Much Better Security
 2. Easy & Secure Remote Access
 3. Spend MUCH Less on Capital
 4. Slash IT Department Expenses

1) Much *Better* Security

- Secure Data centers
 - **Multi-factor** authentications, RFID access, multi-layer firewalls, **anti-DDoS protection**, and physically locked access to your data
 - Much **more secure** than most small organizations can provide
- Access control to your data
 - Requires end **user authentication** with password verification
 - System monitors all accesses and **blocks suspicious activity**

1) Much *Better* Security

- Proper Back up plan for your systems and data
 - Backed-up every day and kept encrypted off-site
 - Data can be recovered easily and quickly
 - Human mistake, local disaster or cyber-attack
- Built-In Regulatory Compliance
 - Data is stored in data centers
 - Compliant with your industry specific regulations
 - HIPAA, PCI and AICPA

Can you see how a cloud desktop is as secure and even more secure than most desktops?

2) Easy and Secure Remote Access

- Software Virtualization
 - Host your business software in the cloud
 - Employees, consultants and clients **access** it **from any machine type** (Mac, laptops, Chromebook, Tablets, Smartphones)
 - Use any operating system
- Server and desktop Virtualization
 - Deliver virtualized hardware to employees
 - Implement a Bring Your Own Device (**BYOD**) policy
 - Support **working from home** program

2) Easy and Secure Remote Access

- Team collaboration tools
 - Includes tools for **file and screen sharing**
 - Easily **share and transfer** files
 - **No third party** file sharing **software** required
 - Don't need GoToMeeting, etc.

You get to work remote—and share screens, transfer files... without extra software. That's pretty good— isn't it?

3) Spend MUCH less on Capital & Upgrades

- Pay As You Save
 - Latest generation computer hardware
 - No cost for software upgrades
 - Cut out hardware purchases you don't need
 - Only pay for what you need... and scale seamlessly
- Multi-users resources sharing
 - Add several users on one instance
 - Every user has a private desktop
 - No more one-to-one computers
 - Hardware/software resources are shared among the users

3) Spend MUCH less on Capital & Upgrades

- Software updates for all users
 - Quick and easy software upgrades and maintenance
 - Auto software updates for everyone
- No up-front or minimal commitment
 - Month-to-month subscription plan
 - Doesn't require any initial investments
 - Available for a single person or thousands of users

Can you see how it can cost LESS for hardware, software and upgrades?

4) Slash your IT Department Expenses

- Building a Cloud Desktop takes minutes
 - Spin up a pre-configured desktop within minutes
 - Fastest way to set up a desktop environment for a new hire
 - Doesn't disrupt your regular work
- All of your IT is managed behind the scene
 - Your WorkSpaces are managed by a professional IT department
 - No additional cost associated with the management of your IT
 - Everything is backed-up and optimized to prevent downtimes

4) Slash your IT Department Expenses

- No specialized IT skills is required
 - Setup wizard walks you step-by-step through the process
 - System is configured without outside help
 - Easily run your IT department and business from your laptop
- You have total admin control of the machines
 - Complete admin rights to manage your cloud computers
 - Control who gets access to your data and business information
 - Install custom apps and monitor user activities from your admin dashboard
 - Always aware of what is going on with your IT and business

Not All Virtual Workspaces are the Same

- Ok, so you're aware of the advantages of cloud workspaces and virtual desktops (including virtual servers)
- Unfortunately, virtual workspaces are *not* all the same
- Some have “*issues*”

Not All Virtual Workspaces are the Same

- Too Expensive
 - Your **first shock** is **the price**
 - Big names like VMWare and Citrix are *not* priced for SMBs
- Requires IT Department
 - **Typical virtual desktops** still **require** a seasoned **technical team to set it up**
 - Hard to replicate for new employees and consultants
 - **Require ongoing management** (trading one IT headache for another)
- Not optimized to run *any* application
 - Many only run *standard* software
 - **Often can't run your custom apps** or unique configurations

Not All Virtual Workspaces Are The Same

- Require additional software
 - Require a “Virtual Private Network” (VPN)
 - Additional applications for sharing files, screen sharing, presentations
 - Can’t provide access for support
- SLOW
 - Most use old technologies invented in the 90’s
 - Not as snappy to load or run
 - Many can’t run video or detailed graphics

The BIG Question?

So, how can you

- Leverage the benefits of virtual desktops without a specialize IT team
- Run ALL your software applications
- Work with machines FASTER than your existing PCs
- All at a price within reach?

Perhaps you should consider...

Introducing...

V2 Cloud
WorkSpaces

World's *Fastest* Cloud Desktop

Credibility

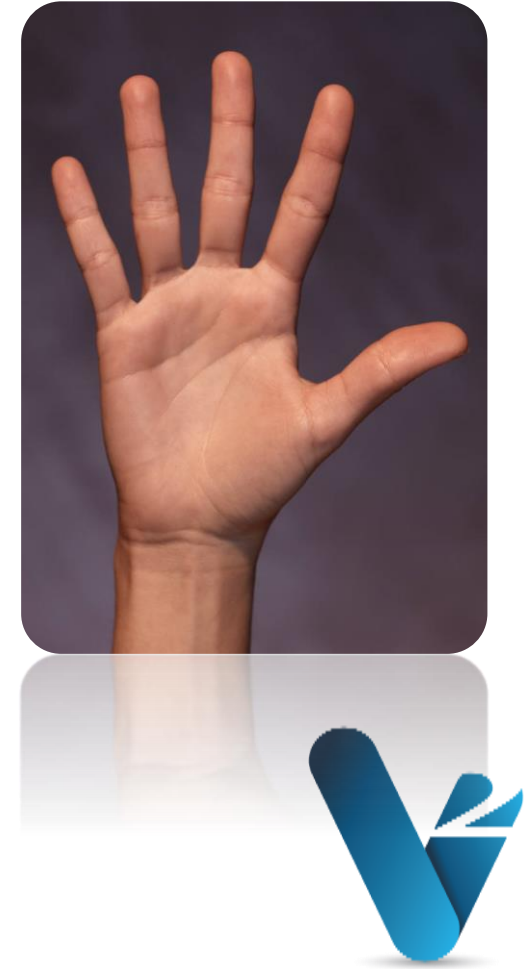

- Already over 12,000 users
- G2 Crowd
 - *High Performer Recognition* - 2018
 - 4.8 out of 5
- 95% retention rate following trial
- Data centers spread across five continents
- Leadership Team includes Sr. VP Motorola, VP GE, launched over 450 products (Apple, Intel, Adobe, Sony, HP, GE, Microsoft and more).

Best Solution

- Five main reasons to consider V2 CLOUD
 1. EASIEST Setup & Installation
 2. BEST Apps & Desktop Delivery
 3. BEST Collaboration
 4. The BEST Performance
 5. BEST Managed Services

Plus, it is the Price Performance LEADER

1) EASIEST Setup & Installation

- EASIEST **Remote Administration**
 - Unified Management for All Endpoints (Virtual Machines)
 - Install custom apps and **set access restrictions to users**
- Does NOT require specialized IT
- **Build** a VM in 5 Minutes
 - Spin up a **Virtual Machine within 5 minutes**
 - **View** your **desktop** screen in your **web browser instantly**
- **No Config Training Required**
 - Configuring the Virtual Machines is simple
 - Only basic knowledge of a computer is required
- VM Setup Templates
 - **Use templates to clone** configs for new users
 - Accelerate desktop delivery to your team or clients

2) BEST Apps & Desktop Delivery

- BEST Networking - NO VPN Required
 - Does not need a VPN to connect (unlike alternatives)
 - Unmetered Internet with the industry's lowest latency
 - Up to *4x faster* than alternatives
- Multiple clients on one VM (auto updates)
 - Add up to 250 users on one Virtual Machine
 - Update a software once, and every user gets updated
- Includes pre-configured RDP clients
 - Encrypted client app--V2Client (turnkey software)
 - All the RDP connections go through a secure SSH tunnel
- Web Connect (Web native)
 - View your desktop through any web browser
- Convert Desktop Apps to the Cloud
 - Make any desktop app appear as a native cloud app

3) BEST Collaboration

- Unified Management for All Endpoints
 - As the admin, you have total control of the Virtual Machine
 - You can **manage all the end users' from your dashboard**
- Built-In Screen sharing
 - **Share your screen *without*** using a third-party software like **TeamViewer**
- File transfer
 - **Transfer files between end users** on the same Virtual Machine

3) BEST Collaboration

- File sync and Sharing
 - Files are kept in sync and up to date across all devices used by the end users
 - No data resides on the end user's machine everything is stored in the cloud
 - Prevents data theft, increases security
- USB Redirection (complete)
 - Redirect ALL your USB devices from a local computer to your Cloud Computer
 - Print directly to your local printer, scan a documenting to your Cloud Desktop

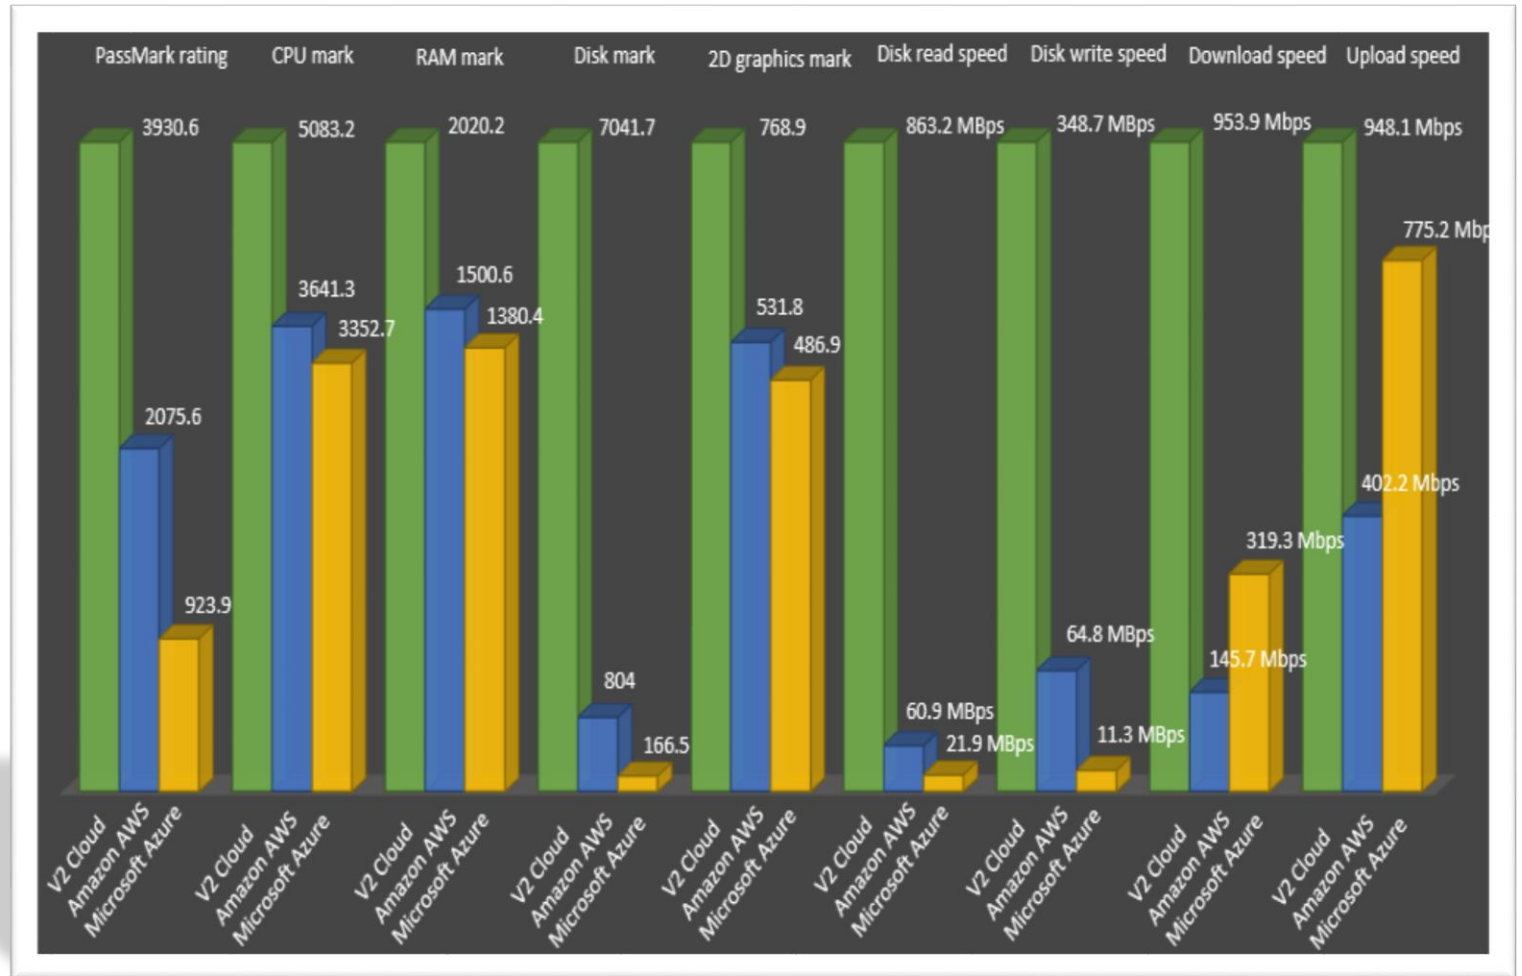

4) The BEST Performance - 10x Faster

- **Consistent UX on Any Device**
 - Access your cloud desktop from any device
 - Still get the same quality experience
 - Responsive display (resizes) to your viewing screen
- **Persistent Desktop**
 - VM doesn't revert to the original state when you sign out
 - You never lose your work as you transition between locations and devices
- **Optimized for Voice & Video**
 - Conduct video conferences from within your Virtual Machine
- **Cloud desktop available 24/7**
 - Up and running every minute of the day
 - 99.9% uptime GUARANTEED with 24/7 live monitoring

4) The BEST Performance - 10x Faster

- 4x faster processor
- 15x faster drives
 - Bottleneck
- Highest speed of *ANY* Cloud Workspace

5) BEST Managed Services

- BEST Monitoring & Maintenance (including live)
 - Specialists monitor your WorkSpaces ensuring it is optimal and always available
 - Timely memory and storage usage analytics/reports
- Security & Back up Management
 - Security professionals manages the defense and back up of your WorkSpaces
 - Your fail-safe system will be up and running within minutes following disaster
 - In the event of a ransomware attack, your system can be restored quickly

5) BEST Managed Services

- Managed hardware and software upgrades
 - Hardware and software upgrades are performed during your non-business hours
- Fully managed Setup
 - Cloud Engineers handle the set up of your WorkSpaces and deliver an access link via email

Show Me *V2 CLOUD*

Let's prove how *V2 CLOUD* is

1. EASIEST Setup & Install
2. BEST Apps & Desktop Delivery
3. BEST Collaboration
4. The BEST Performance
5. BEST Managed Services

Price Performance LEADER

- Affordable
 - Subscriptions plans are **up to 50% less than other vendors**
- No up-front or minimal commitment
 - **Month-to-month billing** and can be setup for a single person or thousands of users
- Automated to reduce workforce cost
 - Can **save you tens to hundreds of thousands of dollars** in IT management costs
- **No** Extra or **hidden fees** for the managed services
 - Unlike others who bill you extra for IT management, it is **100% all inclusive** and included with V2 Cloud
- Industry's **BEST 24/7 Support - FREE**
 - **No cost for support** (phone, online chat, or email)
 - **Response time is within minutes**
 - Remote troubleshooting

What's Holding You Back?

- How do you *justify* the cost of moving your IT operations to the cloud?
 - V2 Cloud provides you access to a high-end cloud desktop infrastructure
 - A fraction of the price if you had it on premise
- Is it less secure to keep my data in the cloud versus on premise?
 - No. Since it is being managed professionally, it is typically *more* secure
- Will the process take long and disrupt my workflow?
 - No. Your migration to V2 Cloud is well planned and executed during your off hours

What's Holding You Back?

- How do you work with sensitive data and compliance standards?
 - V2 Cloud uses only regulatory compliant data centers
 - Everything is guaranteed to be compliant with the latest regulations
- How does V2 Cloud compare to AWS, Citrix, Azure, VMWare?
 - See the competitive matrix

How Does It Compare?

- EASIEST Setup & Installation
- BEST Apps & Desktop Delivery
- BEST Collaboration
- The BEST Performance
- BEST Managed Services
- Price Performance Leader

“I was shocked that it was SO fast—no delays. Faster than my laptop”

The image shows a detailed performance comparison table with multiple columns and rows. The table is filled with data points, likely representing various performance metrics across different categories. The data is visualized using red and blue bars, indicating performance levels or scores. The table is organized into several sections, with each section containing multiple rows of data. The columns represent different performance metrics, and the rows represent different categories or products being compared. The overall layout is dense and technical, typical of a performance benchmark report.

Testimonials

- “...I'll recommend the platform to any software developer who wants to deliver a hosted version of their solution to end-users” -Jeff Knutson, CTO – Contractors Software Group
- “...V2 Cloud has been 2nd to none” -Brad Grimes, General Manager at MGA International Logistics
- “...The ease of use of the V2 Cloud solution makes it SecureFLO's first choice for its secure Desktop-as-a-Service offering - Chacko Pallathucheri, Director of Technology -SecureFLO

Testimonials

- “...V2 Cloud had exactly what I was looking for -Manuel W. Lloyd, Certified ITIL®, ITSM Expert
- “...It is the only solution on the market that is capable of creating a true web-based experience for a windows apps - Igor Shoshkin CEO, Shopping Cart Elite
- “...The responsiveness of the V2 Cloud support team is simply astonishing! - Vic Cizmarik President, TORViC Technologies Inc.
- “...I’ve been using V2 Cloud for over 2 years now, and it has been fantastic -Perm Persaud, Owner of Ark Accounting & Tax PC

Picture This

- It's Monday...
 - Your new employee just walked it. No problem, it took you 5 minutes to setup his Cloud Workspace—he's ready to go.
 - Everything is secure
 - No high budgets for hardware and software upgrades
 - Anyone can work in the office or remote
 - IT expenses have dropped

Life is Good
