

## W.I.S.E

---

### Product Description

W.I.S.E. (Warehouse Information System Expert) is a multi-language rules based WMS system. WISE optimizes all of your warehouse tasks based on a detailed algorithmic rule engine. At the heart of this solution is our Universal Integration Adapter which integrates WISE to AccountMate and other warehouse systems. This creates a powerful solution that is used by successful distribution companies worldwide. WISE is a completely configurable system in which the user defines the location rules, package types, picking rules, shipment procedures, packaging techniques, and all other significant details regarding warehouse operations. WISE then optimizes these tasks based on product, customer, group or any combination of attributes defined by the user.

Through years of WMS implementation experience, the Royal 4 integration specialists have learned that an effective interface should be seamless, non-invasive, and execute transactions in a real-time manner. This is especially vital for mission critical warehouse management systems. A true purpose WMS should not only provide a snapshot of the warehouse to the AccountMate system, but also should give a dynamic, real-time view of all warehouse operations, activities and inventory status.

WISE can also support ERP's Kanban/Work Order functionality. When WISE is being used in conjunction with an ERP system, WISE can be directed to pull stock from bulk storage locations to replenish the production work cells. This serves as an excellent complement to the ERP's Lean Manufacturing process.

To help ERP solutions further improve workflow, increase capacity, and enhance overall productivity, WISE will integrate with most of today's material handling solutions. Some of these solutions include: Horizontal/vertical carousels, conveyer systems, scales, lift systems and other warehouse control systems (WCS) including Royal 4's own developed WCS solution.

### Company Profile

Royal 4 Systems has been providing leading edge software solutions for the warehousing, and logistics environments since 1984. Areas of specialization are warehouse distribution, 3PL, the automotive marketplace (long standing members of SEMA), food, manufacturing and retail distribution. Our WISE Series software specializes in Warehouse Management, Asset Management and Mobile Solutions and seamlessly integrates with your AccountMate system. All implementations are executed by Royal 4 Systems employees. We also supply RF, RFID and Bar Code Printing solutions for our customers and can provide turnkey solutions, including hardware. We are the authors of our Software Solutions. Customers enjoy 99+% accuracy.

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support and warranties are the responsibility of the issuing company.

### KEY FEATURES

- Rules-based Real Time System
- Customers average 99.6% accuracy
- Tier One product at Tier2-3 prices
- Event driven with alert capabilities
- Simple to use, very user friendly

### PRODUCT COMPATIBILITY

AccountMate 9.3, and can integrate with earlier versions via a toolset.
