

WebCustomer

Product Description

The Customer Portal opens a self-service access to your customers, allowing them to view detailed order history, check order status, review outstanding billings and make payments, print statements and update their profiles round the clock. It is a cost-effective solution that eliminates countless phone calls to verify the status of sales orders.

Company Profile

AppFinity Software Corporation, founded in 2003 and based in San Francisco, California, specializes in the design, development, implementation and support of customizable e-commerce solutions that effectively leverage users' existing web sites and accounting systems.

AppFinity's e-commerce products are designed to deliver two-way, real-time information flow between users' e-commerce sites and their accounting systems, resulting in easy, reliable ordering processes for B2C and B2B customers and reduced workload and personnel costs for the company. The net results are healthy bottom line and ROI numbers for companies using AppFinity solutions and very high satisfaction levels for their customers.
