

XCharge

Product Description

XCharge® is a secure payment processing solution hosted on a PCI-compliant gateway to keep your application out of scope of the PCI Compliance Data Security Standards by eliminating local cardholder data storage. This brings your business additional peace of mind and our hosting ensures your version of XCharge is always current.

XCharge is free, regardless of how many users you have. Merchant account rates are competitive and specifically tailored to your processing profile requirements.

With no source code changes necessary, OpenEdge is compatible with AccountMate 7.0 and 8.0 and is simple to install and implement.

Functionality delivered through the XBridge solution includes:

- Search for Customers, Invoices and Sales Return Invoices
- Securely store Credit Card or Check Account information for Customers for 'card/check-on-file' use
- Perform Credit Card or Electronic Check transactions against Sales Orders, Invoices and Sales Return Invoices

Company Profile

We deliver secure, personalized payment solutions. We drive payments innovation – adapting, scaling and simplifying how payments are processed.

OpenEdge mission is to be the industry's leading technology-focused payments company, providing unparalleled service, products and professionalism to help businesses bridge the gap between information technology and payments services. Allowing our partners to achieve a dominant competitive advantage, we anticipate their needs by providing leading-edge technical solutions, dedicated account management and a constantly evolving support infrastructure.

Third party software included on this site has not been tested and is not endorsed by AccountMate Software. Technical support and warranties are the responsibility of the issuing company.

KEY FEATURES

- Streamlines credit card processing; all processing is handled by the system freeing up valuable employee time.
- Reduces data entry errors; data is recorded, verified, and processed directly from AccountMate eliminating data reentry.
- Complete transaction log; all activity is recorded into a log in your AccountMate database(s) providing full audit trails of all transactions.
- Supports multiple AccountMate companies; each company can be setup to use different merchant accounts, gateways, settings, etc.
- Multiple Security features; companies can indicate which users can and cannot process credit cards, credit card processing is hidden from warehouse staff, utilize all credit card fraud.

PRODUCT COMPATIBILITY
